**Subject:** Emission Report Request (Reg# 21147)  
**Attachments:** 21147 Boeing Commercial Airplane.xls

Dear Air Operating Permit Source:

Each year the Puget Sound Clean Air Agency requires Air Operating Permit sources to quantify and report their emissions. This requirement is codified in Agency Regulation I Section 7.09. Please calculate your 2006 emissions and report those emissions that equal or exceed the thresholds below:

25 tpy Carbon monoxide (CO)  
25 tpy Nitrogen oxide (NOx)  
25 tpy Particulate matter (PM10)  
25 tpy Particulate matter (PM2.5)  
25 tpy Sulfur oxide (SOx)  
25 tpy Volatile organic compounds (VOC)  
2 tpy Any single toxic air contaminant (TAC)  
6 tpy Facility combined total of all TACs

For your convenience, we have attached an emission reporting spreadsheet for your facility. This spreadsheet lists the amounts and kinds of air contaminants your facility reported emitting in 2005. It also provides space to record emissions for 2006. Please calculate your 2006 emissions and compare them to the thresholds above. If the facility-wide emissions exceed the above thresholds, fill out the attached spreadsheet and return it to the Agency. Please note that emission reporting for 2006 is required ONLY IF YOUR FACILITY'S EMISSIONS OF AIR CONTAMINANTS EQUALED OR EXCEEDED ANY OF THE ABOVE THRESHOLDS. If the facility-wide emissions did not equal or exceed these thresholds, you do not need to fill out and return the attached spreadsheet. Instead, please email us at [EmissionReporting@pscleanair.org](mailto:EmissionReporting@pscleanair.org) stating that "ALL 2006 FACILITY-WIDE EMISSIONS WERE BELOW THE REPORTING THRESHOLDS".

The attached spreadsheet includes a number of tabs. If you are reporting emissions, the main two tabs you will need to modify are the "Segments" and "Segment - Emissions" tabs. However, please also review the information on the "ID" and "Points" tabs, and revise as needed. After revising and updating the information, re-save the spreadsheet with your registration number, facility name, and emission year (e.g., 12063 America Millwork 2006.xls) and send it to [EmissionReporting@pscleanair.org](mailto:EmissionReporting@pscleanair.org). Please note that it is IMPORTANT TO RETAIN THE STRUCTURE AND FORMAT OF THE SPREADSHEET, so that we can easily and accurately transfer the information reported into our database. If you would like to add notes about the data provided, please add the notes to the unused columns to the right of the data columns. The attached spreadsheet includes tabs named "Chemicals - Reference Only", "SCC - Reference Only", "EPA Devices - Reference Only", and "Methods - Reference Only". These sheets are provided as a reference, and need not be modified.

Detailed instructions for completing the attached spreadsheet are available at: <http://www.pscleanair.org/regulated/businesses/emissions/emisreport2007.pdf>. If you have questions that are not answered by this website, please contact the permit engineer (identified below) that is assigned to you.

Your emission reporting spreadsheet must be completed and returned to the Agency by June 30, 2007.

Sincerely,

Agata McIntyre, PE  
Permit Engineer

If you have any questions, please contact Gretchen Jüttner at (206) 689-4035.
